EXPERIENCE

Data & AI Engineer

EY GDS

📅 Aug 2025 - Present 📍 Kolkata

- Parsed financial **XBRL** files using **Python**, extracting structured data based on taxonomy definitions.
- Analyzed multiple data source websites to identify relevant financial data and determine effective extraction approaches.
- Scraped data from external sources using **Python** to support data collection tasks.
- Processed structured and semi-structured financial data to support analysis and reporting.
- Collaborated with team members to understand data requirements and ensure accurate data extraction.
- Tech Stacks: **Python, SQL, XBRL**

Web Developer

Liberalty Constructions

📅 May 2025 - July 2025 📍 Remote

- Designed and developed a complete company website from scratch using **React.js**, **Tailwind CSS**, and **MongoDB**, delivering a professional and responsive web presence.
- Integrated dynamic content management with MongoDB for efficient data storage of company portfolio and services.
- Implemented responsive UI components to ensure seamless user experience across devices.
- Collaborated with stakeholders to gather requirements and deliver features aligned with business needs.
- Tech Stacks: **React.js, MongoDB, Tailwind CSS, JavaScript, Node.js**

ACHIEVEMENTS

- Built a web scraping automation tool using **Node.js** and **Puppeteer** to streamline college placement applications.
- Gained professional experience as a **Web Developer** at a construction startup, delivering complete website solutions using modern tech stack.

SKILLS

- **Languages:** Python, SQL, JavaScript, C++
- **Data:** Data Parsing, Web Scraping, XBRL, Data Analysis
- **Databases:** MySQL, MongoDB
- **Backend:** Node.js, Express.js
- **Tools:** GitHub, VS Code, Vercel

EDUCATION

B.Tech. (CSE) - 7.98 CGPA

Kalinga Institute of Industrial Technology

📅 2025 📍 Bhubaneswar, Odisha

Higher Secondary - 93.6%

Narayana Junior College

📅 2021 📍 Tirupati, AP

Secondary - 10 CGPA

Narayana High School

📅 2019 📍 Madanapalle, AP

PROJECTS

VideoTube

- Tech used: **Node.js** | **Express.js** | **MongoDB** | **JWT**. [GitHub](#)
- Developed a video-sharing platform backend with user authentication and video upload features using Node.js, Express.js, and MongoDB. Implemented comment and subscription systems for user interaction with JWT authentication. Created scalable backend solution for multimedia content sharing with RESTful API architecture.

Public Notes App

- Tech used: **React** | **Node.js** | **Express.js** | **MongoDB** | **MERN Stack**. [Live Demo](#)
- Created a full-stack MERN app for public note sharing with CRUD, pin, and edit features. Designed responsive UI in React and built RESTful APIs with Node.js and Express.js.

Video Call Application

- Tech used: **JavaScript** | **HTML/CSS** | **Zegocloud** | **WebRTC**. [Live Demo](#)
- Developed a multi-user video call app using Zegocloud and WebRTC. Built an intuitive interface using HTML/CSS and JavaScript for smooth video sessions.

Superset Placement Automation Tool

- Tech used: **Node.js** | **Puppeteer** | **JavaScript** | **Automation**. [GitHub](#)
- Developed a Puppeteer and Node.js automation tool to streamline the college placement process on Superset, securely handling credentials to auto-apply for eligible companies. This significantly reduced time and effort for placement applications by automating login, navigation, and application based on user profiles.
