EXPERIENCE

Data & AI Engineer

EY GDS

Aug 2025 - Present | Kolkata

- Built a **single-file XBRL parser** in **Python** to extract structured data from individual XBRL files based on taxonomy definitions.
- Extended the parser into a **multi-file XBRL parser** capable of processing folders containing multiple XBRL files, enabling batch extraction and structured data output across entire directories.
- Analyzed multiple data source websites to identify relevant financial data and determine effective extraction approaches.
- Scraped data from external sources using **Python** to support data collection tasks.
- Processed structured and semi-structured financial data to support analysis and reporting.
- Collaborated with team members to understand data requirements and ensure accurate data extraction.
- Tech Stacks: **Python**, **SQL**, **XBRL**

Freelance Web Developer

Self-employed

May 2025 - July 2025 | Remote

- Designed and built full company websites from scratch for clients using **React.js**, **Tailwind CSS**, and **MongoDB**, delivering responsive, production-ready web presences.
- Handled end-to-end development — from gathering client requirements to deploying dynamic, content-managed sites.
- Tech Stacks: **React.js**, **MongoDB**, **Tailwind CSS**, **JavaScript**, **Node.js**

ACHIEVEMENTS

- Built a web scraping automation tool using **Node.js** and **Puppeteer** to streamline college placement applications.
- Gained professional experience as a **Freelance Web Developer**, delivering a complete website solution for a construction company using a modern tech stack.

SKILLS

- Languages: **JavaScript (ES6+), TypeScript, Python, C++, SQL**
- Frontend: **React.js, Tailwind CSS, HTML5, CSS3, Vite**
- Backend & APIs: **Node.js, Express.js, REST APIs, WebSockets (Socket.io), Razorpay Integration**
- Databases & ORM: **PostgreSQL, MongoDB, MySQL, Prisma ORM, NeonDB, Supabase**
- Data Engineering: **Data Parsing, Web Scraping, XBRL, Data Analysis, ETL Pipelines**
- Developer Tools & Cloud: **Git, GitHub, Vercel, Render, Postman, VS Code**

EDUCATION

B.Tech. (CSE) - 7.98 CGPA

Kalinga Institute of Industrial Technology

2025 | Bhubaneswar, Odisha

Higher Secondary - 93.6%

Narayana Junior College

2021 | Tirupati, AP

Secondary - 10 CGPA

Narayana High School

2019 | Madanapalle, AP

PROJECTS

WhisprLive

- Tech used: **React** | **Node.js** | **PostgreSQL** **Socket.io/WebSockets**. Live Demo
- Built a real-time, anonymous Q&A platform for live events, workshops, and presentations, letting attendees scan a QR code to ask and upvote questions instantly from their phones with no app download or account required. Gave hosts clean, organized audience feedback in real time without expensive monthly subscriptions.

VideoTube

- Tech used: **Node.js** | **Express.js** | **MongoDB** | **JWT**. GitHub
- Developed a video-sharing platform backend with user authentication and video upload features using Node.js, Express.js, and MongoDB. Implemented comment and subscription systems for user interaction with JWT authentication. Created scalable backend solution for multimedia content sharing with RESTful API architecture.

Public Notes App

- Tech used: **React** | **Node.js** | **Express.js** | **MongoDB** | **MERN Stack**. Live Demo
- Created a full-stack MERN app for public note sharing with CRUD, pin, and edit features. Designed responsive UI in React and built RESTful APIs with Node.js and Express.js.

Superset Placement Automation Tool

- Tech used: **Node.js** | **Puppeteer** | **JavaScript** | **Automation**. GitHub
- Developed a Puppeteer and Node.js automation tool to streamline the college placement process on Superset, securely handling credentials to auto-apply for eligible companies. This significantly reduced time and effort for placement applications by automating login, navigation, and application based on user profiles.
