Deepesh Reddy

+91 9381591921 | contact.deepeshreddy@gmail.com | Portfolio | LinkedIn | GitHub

Summary

Software Engineer with experience in Python-based data processing, backend development, and full-stack application development. Proficient in JavaScript, C++, SQL, REST APIs, and database technologies, with hands-on experience building real-time applications and authentication systems. Experienced in using AI coding assistants to support development, debugging, and test generation.

Technical Skills

Programming Languages: C++, Python, JavaScript, TypeScript, SQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Computer Networks

Backend Development: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication

Databases: PostgreSQL, MongoDB, Prisma ORM

AI-Assisted Development: Claude, GitHub Copilot, Antigravity

Tools: Git, GitHub, Puppeteer, Vercel, Render

Data Processing: Web Scraping, XBRL, Data Parsing

Experience

Data & AI Engineer Aug. 2025 – Present
EY GDS *Kolkata, India*

- Developed a **Python-based XBRL parser** to extract structured financial data using taxonomy definitions and extended it to process entire directories of XBRL files.
- Evaluated financial data sources and developed **Python web scraping solutions** to retrieve relevant information from external websites.
- Processed structured and semi-structured financial data using **Python and SQL**, implementing validation checks to improve data accuracy and consistency.
- Collaborated with analysts to clarify data requirements and used AI coding assistants to support development, debugging, and test generation.

Freelance Web Developer May 2025 – July 2025
Self-employed *Remote*

- Developed responsive client websites using **React, Tailwind CSS, Node.js, and MongoDB**, covering requirements gathering, implementation, and deployment.
- Delivered a content-managed website for a construction company based on client requirements.

Projects

WhisprLive | *React, Node.js, PostgreSQL, Socket.io* Live Demo

- Built a **real-time anonymous Q&A platform** enabling audiences to join live or scheduled sessions via QR codes and submit questions without creating accounts.
- Implemented **WebSocket-based communication** using Socket.io, with live question upvoting, answer status synchronization, and searchable, filterable question feeds.
- Developed room management features including scheduled sessions, countdown timers, automatic expiration, session history, and question transcript export.
- Integrated **JWT and Google OAuth authentication**, role-based plan limits, Razorpay payments, and API rate limiting to support account security and paid room access.

Superset Placement Automation Tool | *Node.js, Puppeteer* GitHub

- Developed a **browser automation tool** using Puppeteer to automate Superset navigation, authentication, and eligible job application workflows.
- Implemented profile-based eligibility checks and automated repetitive browser interactions, with credential handling to support the application process.

Education

Kalinga Institute of Industrial Technology Bhubaneswar, Odisha
B.Tech in Computer Science and Engineering – CGPA: 7.98 *2021 – 2025*

Narayana Junior College Tirupati, Andhra Pradesh
Higher Secondary (Class XI–XII) – 93.6% *2019 – 2021*

Narayana High School Madanapalle, Andhra Pradesh
Secondary (Class X) – 10 CGPA *2019*
